

Decisions: Alcohol Awareness & Education™

COLLEGE EDITION

Meet your requirements for student alcohol awareness education with a fresh eLearning approach.

Prevent.Zone's one-hour online course is grounded in the Social Ecological Model of prevention. It educates students on the physical impacts of alcohol and how peers and other factors can influence safe use and abuse.

“”

“Decisions: Alcohol Awareness & Education™ is destined to be the premier alcohol education course for college students. It educates and challenges students to consider drinking in a thoughtful, planned, and informed manner.”

- Dr. John Clapp, University of Southern California

LEARNING OUTCOMES

As a result of completing this course, students will be able to:

- develop and carry out a plan to **drink safely** if and when they drink,
- promote a **healthy and safe culture** surrounding the use of alcohol,
- **identify expectations** related to alcohol consumption,
- **examine their own motivations** related to alcohol consumption,
- articulate the **effects of alcohol** on themselves and others,
- recognize how alcohol could **interact with other drugs**, and
- **identify and intervene** when a person has overconsumed – or is about to.
