FIRE EXIT

Be Fire Smart!™

COLLEGE EDITION

This online fire safety course was developed in conjunction with the Center for Campus Fire Safety. It allows students to examine their current behaviors and how they could influence fire prevention in their residence halls and off-campus living spaces.

87% said they were very confident they could safely exit the building in case of a fire.

85% said their awareness of fire safety increased.

87% felt more empowered to prevent fires where they live.

Know Your Exits!

To start the course, students are immediately put into an urgent situation and given 10 seconds to escape a campus fire.

At the end of the course, students must prove they are fire smart to pass the course.

We can customize this course to your campus environment, including policies and procedures, floor plans, and visuals to create virtual fire drills and enhance fire safety awareness for students.

You can license and customize this course for your college or university. Contact us today for a free demo.
